CONDITIONAL REQUEST FOR WAIVER OF CHOICE PHONE, LLC

Choice Phone, LLC ("Choice Phone"), by its attorneys, respectfully requests a waiver of the Federal Communications Commission's ("FCC's" or "Commission's") rules and requirements in order to utilize Choice Phone's 800 MHz channels currently located, or to be relocated, between 861 MHz - 862 MHz (the "Guard Band") pursuant to a modified rebanding plan proposed by Sprint Nextel ("Sprint") as part of the ongoing 800 MHz rebanding efforts ("Rebanding").¹ Specifically, in order that Choice Phone's licenses can remain located in or be relocated to the Guard Band,² Choice Phone requests the following: (a) primary status; (b) a

¹ See Improving Public Safety Communications in the 800 MHz Band, *Report and Order, Fifth Report and Order, Fourth Memorandum Opinion and Order*, 19 FCC Rcd 14969 (2004) ("800 MHz Order").

² Pursuant to Sprint's proposal, Choice Phone's licenses corresponding to call signs WNDJ438, WNSS346, WPUV454, and WPRQ903, would all have frequencies assigned in the Guard Band upon completion of Rebanding. However, Choice Phone and Sprint may, if the instant requests are granted, modify the proposal so that different Choice Phone licenses may be substituted for the ones currently proposed by Sprint. Accordingly, the requests herein would need to apply to any of Choice Phone's licenses which would ultimately be assigned to the Guard Band ("Choice Phone Licenses") as a result of a modified rebanding plan. Further, Choice Phone notes that WPUV454, which it acquired from TeleBEEPER of New Mexico, Inc. in 2007, has already undergone Rebanding, but Sprint has agreed to incur the costs of Rebanding this license again, if necessary, as part of its proposal.

waiver of non-interference requirements applicable to ESMR 800 MHz licenses which would remain in or be relocated to the Guard Band;³ and (c) a waiver of the applicable non-interference requirements contained in Sections 90.673, 90.674 and 90.675 of the FCC's rules.⁴ If the requests are not approved for all of the Choice Phone Licenses, then Choice Phone will proceed with Rebanding utilizing the original channel assignments as submitted in its Request for Reconfiguration Funding on April 17, 2009.⁵

I. BACKGROUND

Choice Phone is an ESMR licensee operating in the Territory of Guam ("Guam") and the Commonwealth of the Northern Mariana Islands ("CNMI"). Choice Phone has already been through the initial planning phase of Rebanding and had previously submitted its reconfiguration cost estimate to Sprint and the 800 MHz Transition Administrator ("TA"), resulting in an executed Planning Funding Agreement ("PFA"). While in the process of moving towards completing a Frequency Reconfiguration Agreement ("FRA"), Sprint proposed to revise the original Rebanding plan channel assignments provided to Choice Phone by the TA. Sprint's proposed channel assignments would locate a portion of Choice Phone's licenses in the designated Guard Band.

Choice Phone currently holds licenses corresponding to 175 ESMR channels, and the original channel assignments provided by the TA would have relocated Choice Phone's licenses

³ See *800 MHz Order*, 19 FCC Rcd 15054 ¶ 157 - 162.

⁴ 47 C.F.R §§ 90.673, 90.674 and 90.675. Specifically, Choice Phone requests that the FCC waive applicable non-interference requirements such that Choice Phone would have the same interference protection rights to channels and licenses assigned in the Guard Band as it would have if the channels and licenses were assigned in the ESMR band (*e.g.*, 862 MHz – 869 MHz).

⁵ These conditional requests are submitted with the understanding that Choice will only proceed with Sprint's modified rebanding proposal if primary status can be obtained on all of the Choice Phone Licenses.

to a block of channels from 862 MHz to 866 MHz. Since only 160 channels exist between 862 MHz and 866 MHz, the original channel assignments would necessarily include some frequencies above 866 MHz.⁶ However, not all of Choice Phone's current infrastructure or subscriber units can operate in frequencies above 866 MHz. As a result, significant additional costs would be incurred to replace existing infrastructure and subscriber units, which would also add burdens and cause unnecessary disruption to Choice Phone's customers, thereby increasing the time period for Rebanding.⁷ To address this, Sprint's modified channel assignment proposes to locate all of Choice Phone's licenses in channels between 861 MHz and 866 MHz (but not over 866 MHz), thereby alleviating the need to replace any equipment or subscriber units.⁸

As part of the proposal, Sprint has requested that Choice Phone request a waiver to utilize channels below 862 MHz (in the Guard Band), in place of the originally assigned channels above 866 MHz. If a waiver is granted, Choice Phone will request that the TA assign the new channels proposed by Sprint. Choice Phone and Sprint would then conduct the necessary planning to negotiate an amended FRA and proceed with the Rebanding. If a waiver is not approved, then Choice Phone will proceed with Rebanding, utilizing the original channel assignments, as submitted in its Request for Reconfiguration Funding on April 17, 2009.

⁶ See Appendix for a chart summarizing Choice Phone's licenses subject to rebanding, the current channels, the original channel assignments, and the new proposed channel assignments.

⁷ The additional cost to replace Choice Phone infrastructure and equipment, so that it could operate above 866 MHz, would be approximately one million dollars.

⁸ This modified channel assignment proposal would place a portion of Choice Phone's licenses in the block of spectrum from 861 MHz to 862 MHz, which has been designated as the Guard Band.

II. REQUEST FOR WAIVER

The Commission, in its *800 MHz Order*, established the Guard Band to give public safety licensees an additional one megahertz of separation from the cellularized portion of the band.⁹ In doing so, the Commission grandfathered all licensees currently operating within the Guard Band, but required the grandfathered licensees to continue operating on a strict non-interference basis.¹⁰ Choice Phone is currently operating within the Guard Band with respect to its licenses for call signs WNDJ438 and WNSS346.¹¹ Under Sprint's proposal, the channel assignments for these licenses would remain in the Guard Band, becoming grandfathered, and Choice Phone would be required to operate them on a strict non-interference basis.

Similarly, the Commission's *800 MHz Order* allowed for any 800 MHz licensee, including an ESMR licensee such as Choice Phone, currently operating below 861 MHz, to voluntarily relocate to the Guard Band, subject to the requirement that the licensee operate on a strict non-interference basis.¹² Under Sprint's proposal, the channel assignments for Choice Phone's licenses WPUV454 and WPRQ903 would be relocated to the Guard Band. Consequently, Choice Phone would be required to operate these licenses on a strict non-interference basis.

⁹ See *800 MHz Order*, 19 FCC Rcd 15054 ¶ 157.

¹⁰ *Id.*

¹¹ Choice Phone also operates call sign WPSH546 pursuant to special temporary authority ("STA"), which has been granted continuously by the Commission since April 27, 2001, and was most recently granted on August 12, 2009 (ULS File No. 0003931721). WPSH546 provides service in the CNMI on the same frequencies that WNDJ438 operates on in Guam. Choice Phone intends to request a relocation of WNDJ438, once the rebanding process is completed, to relocate the primary transmitter site so that coverage can also be provided to a significant part of the area currently serviced under the STA for WPSH546. Primary status will be necessary on WNDJ438 in order to provide this coverage.

¹² See *800 MHz Order*, 19 FCC Rcd 15054 ¶ 158 - 162.

Choice Phone requests that the Commission grant, with respect to the Choice Phone Licenses, a waiver of its requirements that licenses grandfathered in the Guard Band and licenses relocated to the Guard Band pursuant to Rebanding must operate on a strict non-interference basis. Accordingly, Choice Phone requests that it be allowed to operate, on a primary basis, all Choice Phone Licenses which would have frequencies assigned in the Guard Band upon completion of Rebanding pursuant to Sprint's modified channel assignment proposal.¹³

A. The Waiver is Necessary to Ensure that Choice Phone Receives Comparable Facilities as a Result of Rebanding under the Proposed Plan

Granting a waiver to allow operation of the Choice Phone Licenses on a primary basis is necessary to ensure that Choice Phone, through the Rebanding process, receives facilities comparable to its current facilities (which are currently all operated on a primary basis). Pursuant to Commission order, relocating licensees are entitled to comparable facilities after Rebanding.¹⁴ If Sprint's proposed plan were to be implemented without a waiver, Choice Phone would be required to operate certain licenses on a strict non-interference basis, while potentially accepting interference from other licensees.¹⁵ This would necessarily result in a reduced level of service not comparable to Choice Phone's existing primary basis facilities serving customers in

¹³ Currently, under Sprint's proposal, licenses corresponding to call signs WNDJ438, WNSS346, WPUV454, and WPRQ903 would have frequencies assigned in the Guard Band. However, Sprint and Choice Phone may need to further modify the proposed assignments to substitute or include other licenses.

¹⁴ See *800 MHz Order* at ¶ 201.

¹⁵ Furthermore, if the proposed plan were to be implemented, Choice Phone's infrastructure would not be replaced and modified to operate above 866 MHz (as it would have been in the original plan). If interference in the Guard Band became a major issue, Choice Phone would have limited options on obtaining additional capacity since it would already occupy frequencies from 861 MHz to 866 MHz, and its infrastructure still would not be capable of operating above 866 MHz. Consequently, obtaining primary status on the Choice Phone Licenses would be critical to ensuring that Choice Phone received "comparable" facilities pursuant to the proposed rebanding plan.

Guam and the CNMI. Additional interference-mitigation requirements could negatively affect the quality of service provided to subscribers, and potentially increase Choice Phone's operating costs, which would inevitably result in additional costs being passed on to subscribers.

B. Granting the Waiver Would Allow Choice Phone to Proceed with Implementing the Proposed Plan, Promoting the Public Interest

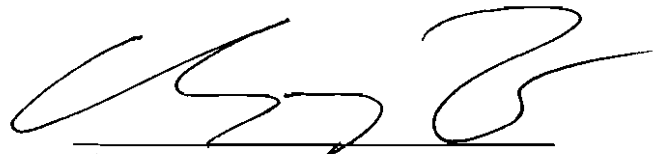

The proposed plan, if implemented, would allow Choice Phone to proceed with the Rebanding process without the need to replace significant infrastructure or subscriber units in order to be able to operate in frequencies above 866 MHz.¹⁶ Sprint's proposed plan would alleviate the significant expense of equipment replacement, as well as potentially expedite the completion of Rebanding in a shorter period of time (than if equipment replacement were to be necessary). Moreover, since no major equipment replacement is needed, implementing the proposed plan would also minimize the potential disruption to subscribers resulting from time consuming infrastructure upgrades. Expediting the Rebanding, reducing costs to subscribers, and minimizing potential disruptions would promote the public interest.

¹⁶ The original rebanding plan involved the assignment of channels above 866 MHz. *See* Appendix.

III. CONCLUSION

For the foregoing reasons, Choice Phone requests that the Commission grant, with respect to the Choice Phone Licenses: (a) primary status; (b) a waiver of non-interference requirements applicable to ESMR 800 MHz licenses which would remain in or be relocated to the Guard Band; and (c) a waiver of the applicable non-interference requirements contained in Sections 90.673, 90.674 and 90.675 of the FCC's rules.¹⁷

Respectfully submitted,

Thomas K. Crowe
